APPENDIX A – List of Preparers and Consultant Team Members

List of Preparers

The following individuals were key members in preparing this environmental document.

City of Lexington

Tammy V. Absher, Director, Business & Community Development

Shook Kelley, Inc.

Larry Zinser II, Principal – Station Area Plan, Development of Proposed Lexington MMTS

URS Corporation, an AECOM Company

Lori Molitor, RLA, Landscape Architect/Senior Planner -- Primary Author

Travis Pollack, AICP, Senior Transportation Planner -- Secondary Author

Marvin Brown -- Historic Resources

Stefan Armington, AICP -- Noise and Vibration

Charles Benton, PWS -- Environmental Resources

Christopher Rocco -- Health and Safety

Christopher Werner, PE -- Traffic

Kory Wilmot, AICP -- GIS Analysis and Maps

Paul Gerlach – Environmental Resources and GIS Maps

Jenna Nichols, PE, LEED-AP, CNU-A -- Track Concepts

Consultant Team Members

Under the TIGER II Planning Grant, Shook Kelley is the Prime Consultant providing master planning and architectural design for the Project and has sub-contracted with URS Corporation – North Carolina to complete preliminary engineering and the NEPA process.

Consultant Team:

Shook Kelley, Inc. [Prime Consultant]

Services:

Master Planning, Urban Design, Architect

URS Corporation – North Carolina [AECOM]

Transit Engineering, Transportation Planning, Environmental Analysis and Documentation, Civil Engineering, Structural Engineer

Vrettos Pappas Consulting Engineers

Fire Protection, Plumbing Engineer, Mechanical Engineer, Electrical Engineer

Gibbs Planning Group, Inc.

Retail Market Research

The Littlejohn Group

Residential Market Research

Vantage Point

Economic & Transportation Development Strategies

Lexington, NC 27292

Re: Request for Amtrak stop at Lexington, NC

Dear Mayor Thomas:

Thank you for your letter of March 28, 2006 requesting that Amtrak consider adding Lexington as a permanent station stop along the Raleigh to Charlotte rail corridor. We acknowledge this request and have already begun the process of evaluating Lexington as a potential stop. As part of this evaluation, we must consider the net financial impact from adding the stop as well as issues related to host railroad approval and engineering requirements. While the timeframe to conduct this analysis varies, we hope to complete the process within 60 days and will report our findings to you at that time.

We appreciate your interest in intercity rail service and look forward to working with the City of Lexington as we progress through the evaluation process. In the meantime, please feel free to call if you have any questions or if I can be of service.

Sincerely,

Jeff Mann
Sr. Director, State Contracts

John L. Gray, City Manager, City of Lexington

**RESOLUTION IN SUPPORT OF OPTION “B”
BOARDING PLATFORM LOCATION
FOR RESTORATION OF PASSENGER RAIL SERVICE
TO LEXINGTON AND DAVIDSON COUNTY**

WHEREAS, the North Carolina Department of Transportation and AMTRAK have designated Lexington for restoration of passenger rail service by 2015; and

WHEREAS, the restoration of passenger rail service in Lexington will require construction of a boarding platform so that passengers can safely access trains traveling both North and South; and

WHEREAS, the Federal Rail Administration awarded the City of Lexington a \$700,000 Transportation Investment Generating Economic Recovery (TIGER) II grant to design the multimodal transportation station, the boarding platform and track improvements and the Depot District Redevelopment Master Plan; and

WHEREAS, the multimodal transportation station will most likely be constructed on the City-owned former Lexington Home Brands Plant 1 property consisting of over 18 acres and nearly 1,700 feet of frontage on the railroad line; and

WHEREAS, the Lexington City Council designated the Lexington Redevelopment Commission to serve as the lead agency to provide oversight of and ensure citizen input into the project; and

WHEREAS, the Lexington Redevelopment Commission selected the architectural firm of Shook Kelley of Charlotte, North Carolina to render all technical, planning, architectural and engineering services to accomplish the project through to completion including the multimodal transportation station, boarding platform and track improvements; and

WHEREAS, two possible locations for the boarding platform both adjacent to the City-owned Plant 1 property have been identified by preliminary engineering design and designated as Option “A” and Option “B”; and

WHEREAS, according to electronic voting results from over 150 citizens at public input workshops held March 8 and May 3, 2012, Option “B” was overwhelming favored because of the following factors:

- its close proximity to the City’s central business district
- facilitates tourism and supports visitors
- promotes walkability
- enhances surrounding neighborhoods

- has the most sensible and favorable impact on the reuse of the City-owned former Lexington Home Brands Plant 1 property
- takes the most logical advantage of existing land ownership patterns
- Option B location along with the North Carolina Department of Transportation proposed future underpass at West 5th Avenue will be the most effective combination for all surface transportation
- connects with existing streets like East 3rd Avenue that are wider and more suited for development; and

WHEREAS, Shook Kelley concurs with the input of the Citizens regarding the placemaking benefits of Option "B" based upon their planning research and analysis to date;

NOW, THEREFORE, BE IT RESOLVED that the Lexington Redevelopment Commission strongly endorses Option "B" as the logical location for the boarding platform to serve restored passenger rail service to Lexington and Davidson County.

Adopted this the 16th day of May, 2012.

William H. McMurray, III, Chairman
Lexington Redevelopment Commission

Rebekah C. Gainey, CMC, Secretary
Lexington Redevelopment Commission

Re: Historic Architectural Resources Survey Report, Lexington Depot District Multi-Modal Station,
Davidson County, ER 12-0759

Dear Ms. Molitor:

In response to the meeting on September 12, 2013, between the City of Lexington, URS, Shook Kelley Architects, and our office, we offer this revised letter regarding the above survey report. This letter is intended to replace our previous letter of July 30, 2013, in its entirety.

For the purpose of compliance with Section 106 of the National Historic Preservation Act, we concur that the **Grace Episcopal Church** (DV 0530, URS Survey #19) is listed in, and remains eligible for listing in, the National Register of Historic Places under Criterion C for architecture, meeting Criteria Consideration A for religious properties. The existing National Register boundaries remain appropriate.

We also concur that both the **Wenonah South Side Mill Village** (URS Survey #4) and the **Wenonah Cotton Mill** (URS Survey #5) are eligible for listing in the National Register. However, given that the history, function, and significance of these two properties are intricately connected, we recommend joining both into a single **Wenonah Cotton Mill and Mill Village Historic District**. This larger historic district is eligible for listing in the National Register under Criterion A for industry and Criterion C for architecture, with a period of significance from the mill's founding in 1886 to 1963. See Attachment 1 for our recommended National Register boundaries, which combine the proposed boundaries of the mill and mill village from the survey report. We note that several houses in the 800 block of South State Street identified as "Wenonah Mill Houses" are contributing to the Lexington Residential Historic District, which was listed in the National Register in 2007. However, due to major modern development along South Main Street, there is no remaining historic fabric to make a connection between the State Street houses and the mill or South Side Mill Village.

We concur that **Uptown Lexington Historic District Expansion** (URS Survey #18) is eligible for listing in the National Register under Criterion A for commerce and government and Criterion C for architecture, and that the National Register boundaries proposed in the survey report appear appropriate. This expansion area includes: the **W.T. Grant Department Store/Kimbrell's Furniture Building** (URS Survey #15); **Redwine's Grocery and Clodfelter's Market** (URS Survey #16); and, the **Hedrick Block** (URS Survey #18A) as contributing resources. We concur that the **Hedrick Block** is also individually eligible for listing in the National Register under Criterion C for architecture. The Hedrick Block National Register boundaries proposed in the survey report appear appropriate. The **Family Shoe Center** (URS Survey #17) is a non-contributing resource within this expanded historic district due to major alterations and loss of historic integrity.

The **Sink, Taylor, and Evans Auto Sales and Service Building** (URS Survey #14), located adjacent to the Uptown Lexington Historic District Expansion, is *not* eligible for listing in the National Register as part of the expanded historic district or as an individual property.

The survey report concludes that the **Dixie Furniture Company** (URS Survey #7) is not eligible for listing in the National Register as there are numerous buildings and additions to the site constructed in 1962 or later and that Criteria Consideration G, requiring properties less than fifty years of age to be of exceptional significance, is not met. We understand that the planning and architectural survey work for this project has been ongoing for some time now, but in evaluating the site today, any construction that dates to 1963 or earlier is not required to meet Criteria Consideration G. Within the Dixie Furniture complex, 8 of the 28 buildings (221,500 of the total 738,000 square feet) were constructed after 1963. However, these later buildings are generally located on the periphery of the site and do not detract from the overall historic integrity of the property.

Historically, the northwestern side of the Southern Railroad, centered along Railroad Street, contained the highest concentration of industrial buildings in Lexington, ranging from factories, mills, bottling plants, water and power infrastructure, and rail-related sites. Today, the remaining industrial sites here offer the best opportunity to convey the significance of manufacturing to the development and economy of Lexington, and are prime examples of local industrial architecture and design. We recommend that a large historic district encompassing the early- to mid-twentieth century industrial, infrastructural, and rail related sites be determined eligible for listing in the National Register under Criterion A for industry and Criterion C for architecture. We propose that this **Lexington Industrial Historic District** include the following properties as contributing resources: the **Dixie Furniture Company** (URS Survey #7); the **Mountcastle Knitting Company/Dixie Furniture Company Showroom** (URS Survey #7A); the **North Carolina Candy Company** (URS Survey #7B); the **Lexington Southern Railway Freight Depot** (URS Survey #8); the **Lexington City Light and Water Office** (URS Survey #9); the **Siceloff Manufacturing Company** (URS Survey #10); the **Eureka Trouser Company** (URS Survey #11); and the **Lexington Shirt Company** (URS Survey #12). A period of significance beginning in 1906 with the construction of the earliest extant resource, the Eureka Trouser Company, to 1963 appears appropriate.

This district also includes the railroad right-of-way, the one-lane tunnel under the railroad connecting Railroad Street and Elk Street, and the enclosed elevated passage over Railroad Street between Buildings 16 and 23 as contributing resources. The tunnel is shown as early as the 1923 Sanborn Map and this elevated passage is shown on the 1948 Sanborn Map update, both within the period of significance. At this time, barring additional information to the contrary, the remaining resources are non-contributing. The three other elevated passages connect Building 16 to Buildings 20 and 28, which were constructed in 1983 and 1980, respectively; logically, these elevated passages were also built well outside the period of significance. The connections between Buildings 10 and 11 and between Buildings 14 and 19 appear to be for equipment/utilities only and are not considered historic resources. Please note, for National Register purposes, post-1963 buildings that were constructed as additions to contributing historic buildings are usually considered part of the contributing resource. Our proposed boundaries for this historic district are shown in Attachment 2; a map and list of the contributing/non-contributing resources within the district are included as Attachments 3 and 4.

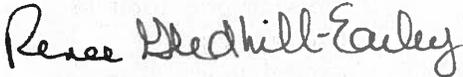

We concur that, at this time, barring additional information to the contrary, the following properties are *not* eligible for listing in the National Register:

- **United Furniture Industries** (URS Survey #1);
- **Lexington Chair Company** (URS Survey #2);
- **Elk Furniture Company/United Furniture Company** (URS Survey #3);
- **South Salisbury Street Houses** (URS Survey #6, containing 700, 701, 715, 720, 724, and 726 South Salisbury Street and 23 East Second Avenue);
- **Wellborn Building** (URS Survey #13);
- **Floyd Lee Berrier VFW Post No. 3074** (URS Survey #20); and,
- The 36 remaining properties in **Section C** of the survey report.

The above comments are made pursuant to Section 106 of the National Historic Preservation Act and the Advisory Council on Historic Preservation's Regulations for Compliance with Section 106 codified at 36 CFR Part 800.

Thank you for your cooperation and consideration. If you have questions concerning the above comment, contact Renee Gledhill-Earley, environmental review coordinator, at 919-807-6579 or renee.gledhill-earley@ncdcr.gov. In all future communication concerning this project, please cite the above referenced tracking number.

Sincerely,

for Ramona M. Bartos

Route & Service Financial Evaluation North Carolina Station - Lexington

Summary

Amtrak has evaluated a station stop at Lexington, NC. This station stop has been evaluated as a stand-alone action.

Proposed Change

Station addition in Lexington, NC between High Point, NC and Salisbury, NC. The station would be served by two round trips per day on the *Piedmont* and one round trip per day on the *Carolinian*.

Benefits

Amtrak estimates that the impact of change in service will result in 10,700 additional passengers annually.

Financial Impact

The estimated financial impact of the proposed station addition will result in North Carolina's annual state operating payment to Amtrak being reduced by \$220,150.

Total Revenue:	\$341,000
Total Expenses:	\$135,850
NEC Thru Revenue Contribution or (Loss):	\$15,000
State Operating Payment (Credit):	(\$220,150)

It should be noted that this option has been evaluated in isolation and is not additive to any other alternatives. For this analysis, Amtrak assumed adding a station will add five minutes to the schedule.

OFFICE OF THE CITY MANAGER
VISION FIRST

January 15, 2016

Travis Pollack, AICP
Senior Transportation Planner/Project Manager
AECOM

Dear Mr. Pollack:

In response to questions from the US Fish and Wildlife Department concerning the possibility of protected bats occupying buildings within the project area of the proposed Multimodal Transportation Station within the City of Lexington, the City offers you the following for incorporation into the EA.

Since the City purchased the former Lexington Home Brands Plant 1 property in 2007, several members of the City staff have been throughout those buildings on a regular basis and hereby attest that bats of any sort have never been observed. Immediately after the closing, City Manager Alan Carson (then the Assistant City Manager) and Director of Public Buildings Steve Crouse spent many days going through the property, taking account of the space and condition of the buildings, identifying any safety issues, systematically securing the property. Afterwards, Steve Crouse became somewhat of the caretaker of the property and was through the property at least once per week, and for many weeks, much more than that. He was involved with managing contents, showing the buildings to prospects, and securing doors and spaces against theft. Soon after the property was purchased, during the time period of securing, and currently, Director of Business and Community Development Tammy Absher was also throughout the property on a regular basis. Her role is to show buildings to prospective developers, and she is the City's liaison assigned to work with the Architectural and Planning firm of Shook Kelley, Inc. to complete the planning process for the multimodal station and the redevelopment plan for the Depot District.

A visual survey for bats has been conducted for the interior and exterior of the buildings during the day. No bats were observed and no evidence of their presence (guano and urine staining) was found. By signing below, Alan Carson, Steve Crouse, and Tammy Absher certify that they have never observed bats in, or outside of, any of the buildings owned by the City, which are known as the former Lexington Home Brands Plant 1 property, and located within the Depot District.

Alan Carson,
City Manager
City of Lexington

Tammy Absher,
Director of Business and Community Development
City of Lexington

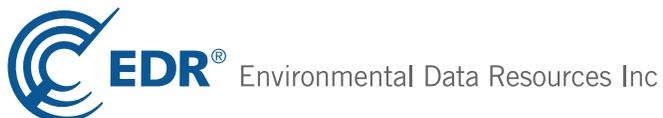

Steve Crouse,
Director of Public Buildings
City of Lexington

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 08/19/2011 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/10/2011 has revealed that there are

State- and tribal - equivalent NPL

NC HSDS: The Hazardous Substance Disposal Sites list contains locations of uncontrolled and unregulated hazardous waste sites. The file contains sites on the national priority list as well as the state priority list. The data source is the North Carolina Center for Geographic Information and Analysis.

A review of the NC HSDS list, as provided by EDR, and dated 08/09/2011 has revealed that there is 1 NC HSDS site within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environment & Natural Resources' Inactive Hazardous Sites Program.

A review of the SHWS list, as provided by EDR, and dated 01/05/2012 has revealed that there are 2 SHWS sites within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 06/27/2011 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/10/2011 has revealed that there are 4 RCRA-NonGen sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Property Highlights: The City of Lexington, NC received a Letter of Eligibility dated December 15, 2006 to enter the site into the NC Brownfields Program PPF - Lexington Home Brands Plant 1, 6/11/07. The City of Lexington NC purchased the site on May 15, 2007 and combined all eight parcels into a single parcel 6725-02-75-9974. NC removed all soil restrictions on the site and expanded groundwater restriction to the entire site in June 2009. The City of Lexington is forming a Redevelopment Commission and intends to market the site for mixed-use redevelopment.

Property Description: Property was operated as the Dixie Furniture Company or successor companies since 1899 through 2003. Operations included wood drying through furniture finishing & shipping.

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

1000248387

from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005

Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Comments: Awaiting gauging and gw monitoring to determine if AFVR or MMPE necessary. Due 1/30/2003. No more action (Session Law 352). Recent groundwater sampling results show concentrations below GCL's. Site risk reduced to low. Can close with NRP. Will have to turn over site to Aquifer Protection for chlorinated solvents. Awaiting public notice to close out.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Corrective Action Summary:

Event date: 11/02/1990
Event: RFA Completed

Event date: 03/31/1992
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 03/29/1993
Event: Stabilization Measures Evaluation, This facility is not amenable to stabilization activity at the present time for reasons other than 1- it appears to be technically infeasible or inappropriate (NF) or 2- there is a lack of technical information (IN). Reasons for this conclusion may be the status of closure at the facility, the degree of risk, timing considerations, the status of corrective action work at the facility, or other administrative considerations.

Event date: 03/29/1993
Event: Stabilization Measures Evaluation

Event date: 04/22/1994
Event: Date For Remedy Selection (CM Imposed)

Event date: 02/05/2010
Event: RFI Report Received

Event date: 06/23/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 06/23/2010
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Facility Has Received Notices of Violations:

Regulation violated: SR - 265.117(a)(l)(i)

Environmental Interest/Information System

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/07/2011	Source: EPA
Date Data Arrived at EDR: 10/12/2011	Telephone: N/A
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 04/05/2012
Number of Days to Update: 141	Next Scheduled EDR Contact: 07/23/2012
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/07/2011	Source: EPA
Date Data Arrived at EDR: 10/12/2011	Telephone: N/A
Date Made Active in Reports: 03/01/2012	Last EDR Contact: 04/05/2012

	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/27/2011	Source: EPA
Date Data Arrived at EDR: 02/27/2012	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 11/10/2011

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/10/2011
Date Data Arrived at EDR: 01/05/2012

Number of Days to Update: 11	Next Scheduled EDR Contact: 06/25/2012
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 10/03/2011	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 10/04/2011	Telephone: 202-267-2180
Date Made Active in Reports: 11/11/2011	Last EDR Contact: 04/03/2012
Number of Days to Update: 38	Next Scheduled EDR Contact: 07/16/2012
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSDS: Hazardous Substance Disposal Site

Locations of uncontrolled and unregulated hazardous waste sites. The file includes sites on the National Priority List as well as those on the state priority list.

Date of Government Version: 08/09/2011	Source: North Carolina Center for Geographic Information and Analysis
Date Data Arrived at EDR: 11/08/2011	Telephone: 919-754-6580
Date Made Active in Reports: 12/05/2011	Last EDR Contact: 02/07/2012
Number of Days to Update: 27	Next Scheduled EDR Contact: 05/21/2012
	Data Release Frequency: Biennially

State- and tribal - equivalent CERCLIS

SHWS: Inactive Hazardous Sites Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Most Recent Revision: 1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

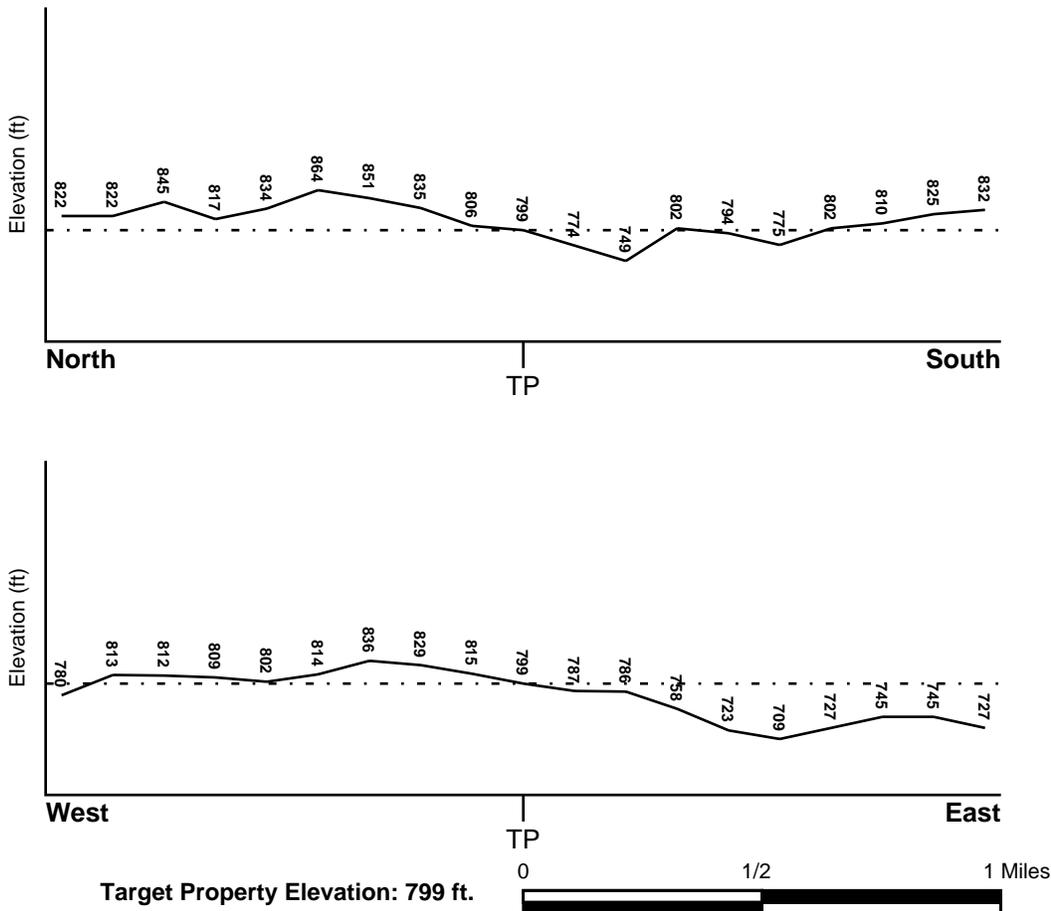

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> DAVIDSON, NC	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
---	---

Flood Plain Panel at Target Property: 37057C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> LEXINGTON WEST	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Mississippian

Code: Pzmi (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Plutonic and Intrusive Rocks

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: CECIL

Soil Surface Texture: sandy clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.50 Min: 4.50
2	7 inches	11 inches	sandy clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
3	11 inches	50 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Elastic silt.	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
4	50 inches	75 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinator soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
loam
clay loam
silt loam
very channery - silt loam
gravelly - sandy loam

Surficial Soil Types: sandy loam
loam
clay loam
silt loam
very channery - silt loam
gravelly - sandy loam

Shallow Soil Types: sandy clay

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

April 2013

MANAGEMENT SUMMARY

The City of Lexington (City) has been approved for a passenger rail stop by the North Carolina Department of Transportation and Amtrak, with service beginning in 2015. Funding is needed to construct the Multi-modal Transportation Station (MMTS), passenger boarding platform, and adjacent track and Complete Street improvements. The City was awarded a TIGER II Planning Grant to prepare a Multi-modal Transportation Station Area Plan (Station Area Plan or SAP) within the City of Lexington's Depot District.

The City of Lexington, with its partners, seeks federal funding to construct the Lexington Multi-modal Transportation Center (MMTC), including a passenger rail station, loading platform, and nearby track and Complete Streets improvements as illustrated conceptually in Figure 1, below. Federal funding will be matched by 18 acres of real property valued at \$2.1 million, \$1 million in cash match, and other in-kind contributions. The City will provide discounted utility rates for long-term operation of the facility. Redevelopment of the Depot District surrounding the MMTC will be furthered by plans for Tax Increment Financing.

In consultation with the North Carolina State Historic Preservation Office (HPO), the City established an Area of Potential Effects (APE) for the Undertaking. Principal investigator and URS Corporation (URS) senior architectural historian Marvin A. Brown conducted a reconnaissance-level survey of the APE. He photographed all resources that appeared to be 50 years old or older or of exceptional importance, and conducted preliminary research into the history of these resources. As part of this effort, he identified 56 individual resources or groups of resources. On October 25, 2012 he presented the results of the reconnaissance-level survey to Justin Kockritz and Ann Swallow of the HPO. They requested that he conduct an intensive-level inventory to determine the National Register of Historic Places (National Register) eligibility of 20 of the 56 resources and include the findings of that effort in a report. Subsequently Mr. Brown conducted additional fieldwork and research and prepared this report. As part of this effort he identified three additional sub-resources of the 20 resources that required individual National Register assessment.

URS makes the following National Register-eligibility recommendations for the inventoried resources:

Resource

Recommendation/Status

Grace Episcopal Church (URS survey #19)	Listed in National Register
Wenonah South Side Mill Village (URS survey #4)	Eligible for National Register listing
Wenonah Cotton Mills (URS survey #5)	Eligible for National Register listing
Mountcastle Knitting Company/Dixie Furniture Company Showroom-Offices (URS survey #7A)	Eligible for National Register listing
North Carolina Candy Company (URS survey #7B)	Eligible for National Register listing
Lexington Southern Railway Freight Depot (URS survey #8)	Eligible for National Register listing
Lexington City Light and Water Office (URS survey #9)	Eligible for National Register listing
Siceloff Manufacturing Company (URS survey #10)	Eligible for National Register listing
Eureka Trouser Company (URS survey #11)	Eligible for National Register listing
Expansion of Uptown Lexington Historic District (URS survey #18) [including assessment of URS survey ## 14, 15, 16, 17 and 18A]	Eligible for National Register listing
Hedrick Building (URS survey #18A)	Eligible for National Register listing

Resource

United Furniture Industries (URS survey #1)
Lexington Chair Company (URS survey #2)
Elk Furniture Company/United Furniture Company (URS survey #3)
South Salisbury Street Houses (URS survey # 6)
Dixie Furniture Company (URS survey #7)
Lexington Shirt Corporation (URS survey #12)
Wellborn Building (URS survey #13)
Floyd Lee Berrier VFW Post No. 3074 (URS survey #20)

Recommendation/Status

Not eligible for National Register listing
Not eligible for National Register listing

I. PROJECT DESCRIPTION AND METHODOLOGY

The City of Lexington has been approved for a passenger rail stop by the North Carolina Department of Transportation and Amtrak, with service beginning in 2015. Funding is needed to construct the passenger rail station, loading platform, and adjacent track and Complete Street improvements. The City was awarded a TIGER II Planning Grant to prepare a Multi-Modal Transportation Station Area Plan (Station Area Plan or SAP) within the City of Lexington's Depot District.

The City of Lexington, with its partners, seeks federal funding to construct the Lexington Multi-modal Transportation Center (MMTC), including a passenger rail station, loading platform, and nearby track and Complete Streets improvements as illustrated conceptually in Figure 1. Federal funding will be matched by 18 acres of real property valued at \$2.1 million, \$1 million in cash match, and other in-kind contributions. The City will provide discounted utility rates for long-term operation of the facility. Redevelopment of the Depot District surrounding the MMTC will be furthered by plans for Tax Increment Financing.

The Depot District is comprised of approximately 65 acres, 18 acres of which is the former Dixie Furniture Company or Lexington Home Brands furniture manufacturing facility (LHB) purchased by the City in May 2007. The remainder of the district is made up of active retail and restaurant space, potential redevelopment and infill properties, places of worship, and a portion of the active Main Street business district. The Station within the Depot District will serve as a passenger rail stop, as well as the hub for bus, taxi, bicycle, and pedestrian networks.

In consultation with the North Carolina HPO, the City established an Area of Potential Effects for the Undertaking (Figure 2). Principal investigator and URS Corporation senior architectural historian Marvin A. Brown, who meets the Secretary of the Interior's standards for Historic Architecture and History (36 CFR Part 61), conducted a reconnaissance-level survey of the APE during the weeks of March 5 and October 15, 2012. He photographed all resources that appeared to be 50 years old or older or of exceptional importance. He also conducted preliminary research into the history of these resources. As part of this effort, he identified 56 individual resources or groups of resources. On October 25, 2012 he presented the results of the reconnaissance-level survey to Justin Kockritz and Ann Swallow of the HPO. They requested that he conduct an intensive-level inventory to determine the National Register eligibility of 20 of the 56 resources and include the findings of that effort in a report. They stated that the report did not require general historic or architectural contexts. During the week of November 5, 2012, Mr. Brown conducted additional fieldwork and subsequently conducted additional research and assessment. He engaged in research at the Lexington Public Library, Davidson County Courthouse, and Davidson County Historical Museum in Lexington; at the State Library, North Carolina State University's Hill Library, and the HPO in Raleigh; and the Wilson Library of the University of North Carolina at Chapel Hill. He also conducted extensive online research. Particularly useful electronic resources were the *Lexington Dispatch* and Sanborn insurance company maps. As part of his fieldwork and research, he identified three additional sub-resources of the 20 resources that required individual National Register assessment. He subsequently prepared this report, which complies with the basic requirements of: Section 106 of the National Historic Preservation Act of 1966, as amended; the Department of Transportation Act of 1966, as amended; the Department of Transportation regulations and procedures (23 CFR 771 and Technical Advisory T 6640.8A); and the Advisory Council on Historic Preservation regulations on the *Protection of Historic Properties* (36 CFR 800).

NOTE: Lexington's streets are not laid out along the cardinal directions. For ease in discussion, though, directions in this report are given as north, south, east, and west. Numbered streets (such as 3rd Avenue) are taken as running north-south and named streets (such as Main) are taken as running east-west. Thus, the actual northwest side of a building is called north, southeast called south, northeast called east, and southwest called west. Unless otherwise noted, though, all maps in the report with the exception of some Sanborn maps are oriented with true north at the top.

II. NATIONAL REGISTER ELIGIBILITY ASSESSMENT

A. Resources Listed in the National Register

GRACE EPISCOPAL CHURCH (URS survey #19) 419 South Main Street

History

Grace Episcopal Church (DV-530) was listed in the National Register of Historic Places in 2006 (Figure 3- Figure 7). Its periods of significance were 1902 and 1918, and its areas of significance were architecture and art. The nomination's summary statement of significance states in part (Phillips 2006):

When the Episcopal congregation of Lexington, in Davidson County, North Carolina, decided to build their third church and change its name and location for the third time, they selected the Charlotte architectural firm of Charles C. Hook and Frank Sawyer—one of the most prominent and prolific firms of the day in North Carolina—to design the church. With J. C. Morris of Greensboro serving as contractor, the cornerstone for Grace Episcopal Church was laid in 1901. The building was completed in 1902 with the first service held on Easter Sunday, and consecration followed on October 13, 1903. Hook and Sawyer designed the brick church in the Late Gothic Revival style, making use of such stylistic features as a steep, front-facing gable roof; an asymmetrical facade with a bold corner entrance/bell tower and a projecting, polygonal narthex; lancet-arched doors and windows; buttresses; and, on the interior, a center-aisle nave, a trussed and bracketed wood ceiling, and an inset, vaulted apse. The well-preserved church is a rare example of the Late Gothic Revival style in Davidson County and is the best example of the overall Gothic Revival from any period in the county.

In 1918 a three-part, stained-glass altar window designed and executed by the famed Tiffany Studios of New York was installed in the church. Depicting the Resurrection (also known as the Three Marys at the Tomb), the richly colored, opalescent and, at the same time, ethereal window exhibits the stained-glass technique devised by Louis Comfort Tiffany wherein depth, tonality, and texture were created within the glass itself rather than being achieved with the assistance of paint. The window at Grace Episcopal Church is the only Tiffany window in Davidson County.

...

Grace Episcopal Church fulfills Criterion C for listing in the National Register because of its local architectural and artistic significance. It also meets Criteria Consideration A because it derives its primary significance from its architectural and artistic distinction. The church has two periods of significance, which coincide with its significant dates: 1902, when construction of the church was completed, and 1918, when the Tiffany window was installed.

Description

The nomination's description states in part (Phillips 2006):

Located at 419 South Main Street in Lexington, North Carolina, the 1901-1902 Grace Episcopal Church is a west-facing, red brick Late Gothic Revival-style building. It exhibits such typical features of the style as a steeply pitched gable roof, lancet-arched doors and windows, buttresses,

and a front corner tower. Atypical features include the detailing of the tower and the polygonal narthex that projects from the front of the church. Side and rear additions to the church dating from 1951, 1957, and 1964 are sensitively placed, attached, and designed. North of the church is a narrow, paved, and landscaped parking lot that runs from the street to the rear of the 1951 addition. A small lawn with two ornamental trees separates the front of the church from the sidewalk and street. Boxwoods and low shrubbery surround the church. Shrubby and small trees also line the north side of the 1957 and 1964 additions next to the parking lot.

The nominated property, forming a rectangle composed of the church with its additions and parking lot, constitutes part of the current church tax parcel. The remainder of the property extends southward to East Fifth Street and eastward to South Salisbury Street, excluding a rectangular quarter-acre house lot at the corner of East Fifth and South Salisbury streets. The non-nominated portion of the church property contains the detached 1987 church, located south of the 1901-1902 church and built on the former church parking lot....

Assessment and Boundaries

Grace Episcopal Church retains the significance, integrity, and boundaries described in its National Register nomination. It retains a high degree of integrity for all seven elements of integrity. Its boundaries, which encompass less than one acre, remain the same as those described in the nomination (Phillips 2006): “The boundary of the nominated property is delineated by the bold black line on the accompanying Site Map, drawn to a scale of 1" = 100'. It is a portion of Davidson County tax parcel 11-113-0-00H-0002 (a.k.a. PIN 6725-02-75-4746).”

B. Resources Recommended as Eligible for National Register Listing

WENNONAH SOUTH SIDE MILL VILLAGE (URS survey #4) 927-939 South Salisbury Street and 936-958 Wenco Drive

History

Twenty-one of the 23 houses that comprise this resource first appear on a Sanborn fire insurance company map of March 1896 (Figure 8, left) in a separate box under the title “South Side Dwellings”: 936 to 951 Wenco Drive and 927 to 939 South Salisbury Street. All 23 of the houses may have been standing at that date, for the map coverage is truncated, cutting three off in the middle. (The previous Sanborn maps of June 1885 and July 1890 do not include the houses, but their coverage is limited to two pages of downtown Lexington.) The 21 (or all 23) houses date from between the drawing of the 1896 map and 1886, when William E. Holt acquired the approximately 22-½-acre tract—including the houses’ current lots—upon which he was to erect his Wennonah Cotton Mill immediately to the east (Davidson County Deed Book 38/Page 129). Tax records, which are less trustworthy the further back in time one goes, confirm this date range: they assign the date 1895 to the houses.

The 1896 Sanborn map does not specifically identify the South Side dwellings as being part of a mill village or having a connection with Wennonah. However, the houses are part of W.E. Holt’s 1886 tract, which he transferred with other lots to his Wennonah Cotton Mills Co. in 1910 (Davidson County Deed Book 68/Page 231). The deed refers to that large tract as the “Factory lot.” The 21 dwellings are all now owned, as a single tract, by the K&T Group and Robert C. and Elizabeth Baxter (Davidson County Deed Book 2040/Page 470 (2011)).

It is unclear from deed records whether the two houses not depicted on the 1896 Sanborn map—953 and 958 Wenco Drive at the west end of the street—were owned by Holt or Wennonah or privately held (see for example Davidson County Deed Book 101/Page 242 (1926) and Deed Book 112/Page 203 (1929)). However, subsequent Sanborn maps and physical appearance strongly suggest that all of the 23 South Side houses were erected about the same time, whether privately or by Holt in his role as president of Wennonah Cotton Mills. The March 1913 Sanborn map clarifies the close proximity of the houses to Wennonah, showing little land and no buildings separating them from the mill complex (Figure 8, right).

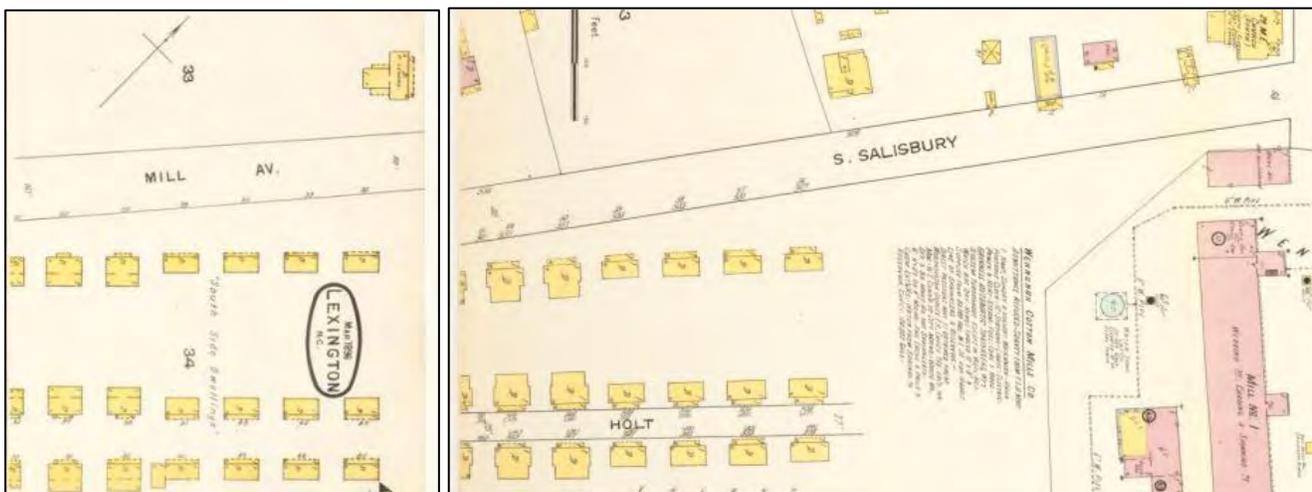

Figure 8: March 1896 Sanborn map at left and March 1913 Sanborn map at right; note on later map proximity of houses to mill and addition of street between lower houses, first named Holt

The December 1923 Sanborn map depicts all 23 houses for the first time (Figure 9, left). A comparison of that map with the June 1929 Sanborn updated through March 1948 uncovers a few changes to the group of houses and their surroundings (Figure 9, right). One house, currently located at 953 South Salisbury Street at the southeast corner of the intersection of Salisbury and Holt streets, is not present on the 1923 map or its 1929 successor. It first appears on the 1948 map. It was moved to its current site, likely from the west, when East 10th Avenue/Cotton Grove Street was moved northeast to its current location (shown on the 1948 update). Or it was moved from the northwest, either in association with the moving of the road or the ca.1946 construction of the million-gallon water tank depicted on the 1948 map. A comparison of the 1948 map with modern maps shows one further later alteration to the landscape, the shifting of Holt Street—now the narrow portion of Wenco Drive that turns back out onto Salisbury—to the east (Figure 19).

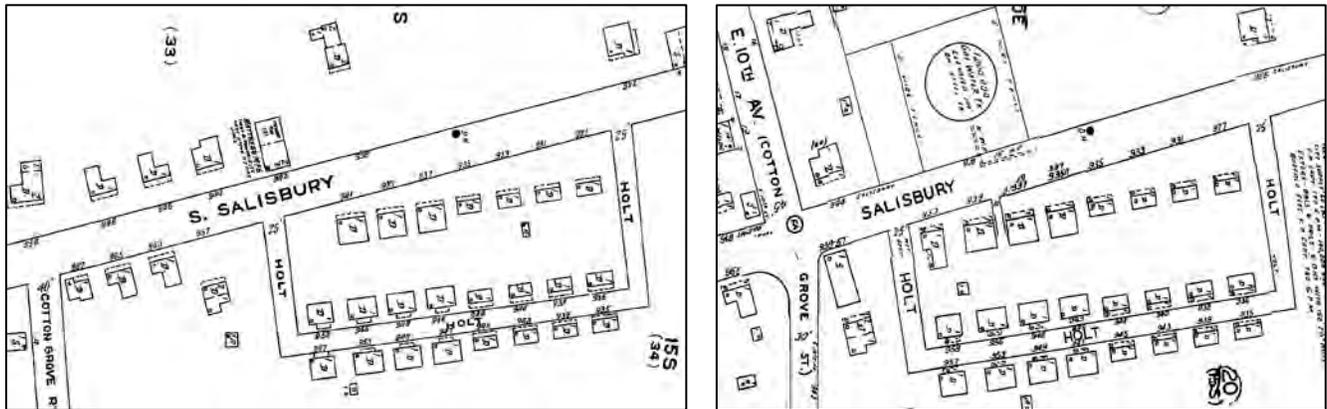

Figure 9: December 1923 Sanborn map at left and Sanborn map updated through March 1948 at right, which depicts 953 South Salisbury Street on its current alignment

While maps, deeds, and physical appearance suggest that all of the 23 dwellings were erected as Wennonah mill houses—and remained in company hands until the late 20th century—city directories tell a counter story. They indicate that by the second quarter of the 20th century the houses were occupied, and sometimes even owned, by individuals with occupations both mill and non-mill related, and both African-American and white.

The two earliest city directories identified for Lexington are 1916-1917 and 1925-1926. None of the houses are included in the 1916-1917 directory. The Salisbury Street houses first appear in the latter directory. A few of the Holt Street houses are included in the 1928-29 directory, but a large number are first included only in the next available directory of 1937. While addresses change or are not included at all, the directories suggest there were two separate groups who inhabited very similar houses, a white community on Salisbury and a black one on Holt. In both communities, some worked at Wennonah, but many did not.

In 1925-1926, 927 through 939 South Salisbury Street were occupied by white families, none of whom reportedly owned their homes (Table 1). Three residents were identified as working at the Wennonah cotton mill and one at the Elk furniture factory. Three had no occupation listed. In 1937 all seven houses had at least one occupant working at Wennonah (Table 2). Again, all were white and none owned their homes. This suggests that the housing was indeed owned by Wennonah.

SOUTH SALISBURY STREET 1925-1926 CITY DIRECTORY				
Address: Current (Then)	Occupant	Employer/Occupation	Race	Owner
927 (same)	ES Ward	Elk Furniture - employee	White	No

Table 2: 1937 city directory information for South Salisbury Street residents of South Side houses

The 1928-1929 city directory does not include Holt Street in its street-by-street listing. However, back-checking of names of individuals who lived on the street in 1937 turned up three who also lived there in 1928-29. As shown in Table 3, all were black, one reportedly owned his own home, and none worked at Wennonah.

___ Holt	Robert Williams	Laborer	Black	Yes
___ Holt	Peter Young	Gardener	Black	No

Table 4: 1937 city directory information for Holt Avenue residents of South Side houses

The 1937 directory (Table 4) identifies 12 African-American individuals or families living on Holt Avenue within its street-by-street section, although it does not include any street numbers. Three items stand out. None of the named individuals work at Wennonah, five reportedly own their homes, and one—Robert E. Kennedy, a non-homeowner—was white. The information in the two directories suggests that Wennonah did not own the houses at these dates or, for undetermined reasons, the black occupants incorrectly claimed home ownership. The presence of a white resident suggests that perhaps the houses had once all been occupied by white families. The lack of a road serving the houses for many years, however, might suggest continued black occupancy. And the fact that some of the black residents of Holt Street, in spite of having more menial jobs than those of the white residents of adjacent Salisbury Street, reportedly owned their own homes, while none of the Salisbury residents did, raises additional questions. As does the question of why both women on the street were homeowners, but only three of the ten men. Further research would be required to tease out the answers to this unusual set of circumstances.

Description

All 23 of the South Side dwellings are very similar (Figure 11-Figure 18). All are one-story tall, frame, and gable-ended, with three bays—a window to either side of the entry—across their front facades. All have replacement modern porches that are only as wide as their entries or that extend across all three bays but not the full façade. All are sided with vinyl and stand on concrete-block foundations that do not appear to be original. All or almost all have modern one-over-one sash. (It was not determined whether all of the apparent six-over-six sash, which marks some window bays, is of the modern snap-in variety.)

The houses can be divided into two groups, however, that vary by roof pitch, the symmetry of their facades, and original presence or absence of rear ells. Twelve houses—the four eastern houses on South Salisbury Street (927, 929, 931, and 933), and the eight behind (south of) them on either side of Wenco Avenue (936, 938, 940, and 942 on the north and 937, 939, 943, and 945 on the south)—have relatively steeply pitched gables, clearly asymmetrical front elevations, and no original ells. The other ten houses—935, 937, and 939 South Salisbury and 946, 947, 948, 949, 950, 951, and 958 Wenco—have shallower gable pitches, symmetrical front elevations, and original shed-roofed ells, which are visible on the Sanborn maps. The only exception is 953 Salisbury, which has an off-center front door that may have been shifted.

Recommendation and Boundaries

The 23 houses of the Wennonah South Side Mill Village are National Register-eligible under Criterion A for their significance as a very early mill village and a very early example of worker housing in Lexington, regardless of how questions about their ownership might be resolved. They retain sufficient integrity of all seven aspects of National Register integrity to support this significance, in spite of their alterations. Due to the alterations of siding, sash, and porches, however, the group of houses does not retain sufficient integrity to support eligibility under Criterion C for their architecture. The period of significance for the houses is ca.1886-1896. The boundaries of the resource contain the following three parcels: Parcel 11134000K0002 / Pin 6725-04-53-8648 (927-939 South Salisbury and 936-951 Wenco); Parcel 11143000H0002 / Pin 6725-04-53-7445 (958 Wenco); and Parcel 11143000H0002C / Pin 6725-04-53-8308 (953 Wenco). These parcels encompass approximately four acres (Figure 19).

**WENNONAH COTTON MILLS (URS survey #5)
800 South Salisbury Street**

History

William Edwin (W.E.) Holt established the Wennonah Cotton Mills Company in Lexington on July 15, 1886, when he acquired about 22.5 acres for his enterprise. This started the modern textile industry in Davidson County. Construction began by the fall on Mill No. 1. Built of bricks made on the property, the mill opened in the spring of 1887. Checks recorded in company Journal #1 drawn to Watson & Cecil, and D.K. Cecil individually, suggest they were the contractors for the first mill (Sink and Matthews 1972:289; Sink 1925:39; Leonard 1927:315; Wennonah Cotton Mills Co. 1986:1; Davidson County Deed Book 38/Page 129 (1886)).

The company soon began to acquire machinery. In October it bought its first looms from Thomas Wood & Company of Philadelphia, from which it continued to make purchases over the next ten months. In November 1886 it purchased 12 spinning frames, with a total of 2,496 spindles, from the Whiting Machine Works of Whitinsville, Massachusetts and 130 textile cans from Massachusetts' Lowell Machine Shop. In December it purchased a drying machine from Butterworth & Sons of Philadelphia and unspecified items from the Atherton Machine Company of Lowell, Massachusetts. In January 1887 the company began to acquire warp and filling yarn. Holt's speed in bringing his enterprise up and running was not surprising, for he was far from ignorant of the industry. His father was E.M. Holt, one of North Carolina's textile pioneers. Growth was rapid and by about 1892 Holt had added Mill No. 2 to the complex (Wennonah Cotton Mills Co. 1986:2, 12). Sink and Matthews (1972:289) recount some of the company's history from early surviving records:

The mill's oldest payroll book in existence shows that there were 129 employees for the week ending January 5, 1889. The weavers averaged \$5.94 for a week of six days, twelve hours per day; the "managers" were paid \$12.00 for the six-day week. Workers, happy to receive such wages, moved to Lexington. The company built houses to rent to the employees, at nominal rate according to records. There was a chapel, behind which was a well where most of the people in the village got their water. The company had a store and later, its own fire department. The company, also, helped build several churches; Mr. Holt deeded the land to the congregations.

Wennonah was reorganized in 1911: Holt received 992 of the 1,000 shares allocated as part of the reorganization. The remainder were held by his son, W.E. Holt, Jr., and three others. After Holt's death in 1917 his son became president of the company (Wennonah Cotton Mills Co. 1986:25, 60; *Lexington Dispatch* March 21, 1958).

In 1923-1924 Wennonah employed from 250 to 300 workers who produced chambrays, ticking, plaids, and other goods. Mill No. 1 contained 5,488 spindles and 214 looms and Mill No. 2 held 240 looms and 7,488 spindles. The complex was the second biggest in the county, trailing only Erlanger Cotton Mills, also located in Lexington (Sink 1925:39, 45). By 1972 Wennonah was manufacturing "yarn dyed, gingham, checks and plaids" (Sink and Matthews (1972:289)). At that date its employees number 400. From 1973 into the 1980s, Wennonah was owned and operated by competitor Dacotah Cotton Mills (Wennonah Cotton Mills Co. 1986:60; Davidson County Deed Book 516/Page 92 (1973); Davidson County Deed Book 626/Page 490 (1984)). While under Dacotah's ownership in the 1980s, Wennonah ceased production and its machinery was removed over time and sold off (Wennonah Cotton Mills Co. 1986:60). The Wennonah complex is currently owned by Tar Heel Properties of Lexington.

Description

The principal buildings currently standing within the Wennonah Cotton Mills complex date from its earliest construction: the complex would likely be readily recognizable to a late nineteenth-century time-traveler/mill worker (Figure 20 - Figure 26). **Mill No. 1** on the west, the first built, remains a long, massive, two-story, brick building (Figure 27 - Figure 34). It retains its corner quoins, three-story stair towers, and ornately corbelled

cornices, pilasters, and arched bays. An original one-story picker house also remains affixed to its south end. Virtually all of the mill's many bays, which once provided copious amounts of natural light to the interior, have been bricked in or otherwise sealed. Additionally, it has lost the mansard roof that once topped its east stair tower, as well as two soaring squared chimneys. A series of one-story dye and machine-related buildings that were erected between ca.1886 and 1948 adjacent to part of its long west elevation have also been removed. A few small, later additions have been appended to the mill.

East of and perpendicular to Mill No. 1 stands **Mill No. 2**, which was built within a few years of the first mill (Figure 35 - Figure 38). It too is a long, rectangular, two-story, brick factory building with arched bays divided by pilasters and three-story stair towers. Its cornices are corbelled, but less elaborately than those of its predecessor. It retains an imposing 110'-tall brick stack at its southeast. Like Mill No. 1, its bays have been filled and it has picked up additions, notably at its east end. The historic ones date from ca.1896-1902, ca.1929-1948, and ca.1949-1959. There are also two relatively small modern additions at the east and west.

The complex also retains six early detached buildings. To the south of Mill No. 1 is a rectangular, one-story, brick **Cotton Storage** building erected contemporaneously with that mill (Figure 42). Its bays have been bricked in, but it retains the segmental arch of a former opening and parapet walls. To the east of Mill No. 1 is a one-story brick-veneered building that originally served as **Cotton Warehouses and Opening Room** (Figure 39 and Figure 43). The three warehouses, which are divided by decorative parapet firewalls, were erected between 1896 and 1902. The opening room was added between 1929 and 1948. Its angled southeast elevation reflects the former presence of a railroad spur. Opposite (south of) the opening room, on what would have been the other side of the tracks, is an individual, one-story, brick **Cotton Warehouse** that was also erected between 1929 and 1948 (Figure 43). The former Wenonah **Office** stands to the north of Mill No. 1 and Mill No. 2 at the complex's principal Salisbury Street entrance (Figure 40). Its central brick portion was erected between 1886 and 1896 and retains corbelled arches at its windows. Between ca.1949 and 1959, additions were made on its north and south elevations. Just across the entry drive from the former office, adjacent to Mill No. 1, is a one-story, brick, gable-end **Warehouse** that dates from ca.1902-1907 (Figure 41). It retains a segmental arch over one filled window bay. Affixed to its west end is a long, one-story, metal-sided, brick **Stock Room** (Figure 44). Half of it, divided from the warehouse by a parapeted firewall, was erected between 1929 and 1948. It was extended further to the west between ca.1949 and 1959. Other smaller detached buildings that once stood near the two mills, along with a dye house complex partially attached to the west side of Mill No. 1, are no longer extant.

Recommendation and Boundaries

The Wenonah Cotton Mills complex is recommended for National Register listing under Criterion A for its association with the textile industry in Lexington and Davidson County from the late nineteenth century into the mid-twentieth century, and under Criterion C as an excellent example of industrial architecture from that period in the city and the county. The complex is unusually intact, retaining almost all of its original late nineteenth-century buildings, including its two mills, its office, and a cotton storage building. These buildings—along with a stock room, cotton warehouses, a cotton storage building, and an opening room built between ca.1896 and 1948—are solidly constructed of brick and, in the case of the mill buildings, neatly finished. They well represent the necessities of late nineteenth and early/mid-twentieth-century textile production and the architecture that housed this production. The enclosure of bays and some intrusions added between ca.1959 and 1984 detract from but do not overcome the complex's integrity of design, materials, and workmanship. The complex retains its other elements of integrity—setting, feeling, location, and association—intact. The integrity of the complex is sufficiently intact to support its eligibility under Criteria A and C. Its period of significance is ca.1886-1959, by which date it was almost completely built out. Its boundaries are those of its 10.45-acre lot—Parcel Number 11134000K0001 / Pin ID 6725-04-64-3103—which encompasses all of its buildings and the land that has historically surrounded them (Figure 45).
